

Falcon

OVERVIEW

FALCON software was designed with ease of use and simplicity in mind. Depending on what the operator wants to see the main dashboard view can be toggled to display up to 6 sensors or 2 sensors and a real-time graph. Pairing this easy to use interface with auto-record and one click PDF job report creation makes FALCON a must have for many service truck applications.

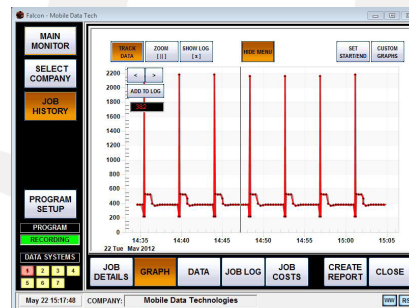

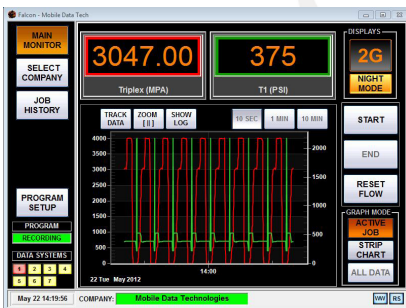

SPECIFICATIONS

- Supports single monitor 800x600 resolution in Day & Night Modes
