

mDAS

OVERVIEW

mDAS is MDT's flagship Data Acquisition solution. Primarily used on service trucks in the Oil & Gas industry. With proven industrial hardware and well thought out architecture, this system is simple to use and widely versatile.

MDT
MOBILE DATA
TECHNOLOGIES

SPECIFICATIONS

- Powder coated enclosure (14" L x 12" W x 6" H)
- Power input 12VDC, 10A or 24VDC, 5A
- 8x Analog Channels
- 2x Counter Channels
- 4x Relay Output
- 2x 24VDC Power output
- 3x Ethernet connections
- Operating temperature -10 °C to 45°C (14°F to 113°F)

KEY FEATURES

- Ability to expand total I/O count with available add on modules
- Real time monitoring and recording of analog (pressure, temperature, tank level, density, etc.) or frequency (flow rate/total) signals.
- High Pressure Shutdown, Audio Alarm, etc. (additional hardware required)
- Wireless capabilities with remote technical support - 24/7/365

REMOTE VIEWING

- With optional software/data streaming package you can view your equipment live!
- Contact us for more information on specific Data Acquisition & Control options
